

## Management of Marine Resources

Lecturer: Dr. Pierpaolo Consoli  
[pierpaolo.consoli@unina.it](mailto:pierpaolo.consoli@unina.it)

*Marine resources include all living and non-living components of the marine ecosystem providing resources for food, energy, tourism, and economic development. These benefits provided by marine ecosystems are referred to as Ecosystem Services. Understanding the value of marine ecosystems to mankind in terms of the services provided is crucial for evaluating how best to manage human activities in order to maintain or enhance the provision of marine goods and services.*
